

Introduction to patient/parent held oncology records

The patient/parent held oncology records have been developed to provide you with information and help you communicate between the nurses and doctors you will meet during treatment. There is a contact sheet at the front of these records with the telephone numbers that you may need.

If your community nurse visits or you attend hospital, please take these records with you and ask the doctor or nurse to write in them.

Blue section

This section provides a record of:

- Blood result records, including MRSA swabs, bung and dressing changes
- Appointment and diary sheets
- Information/record sheet
