

# Grown up Guidelines for Paediatricians

Dr Ian Rodd

# My problems (a small selection)

- I am a generalist
- I don't like reading guidelines
- I have short attention span

But...

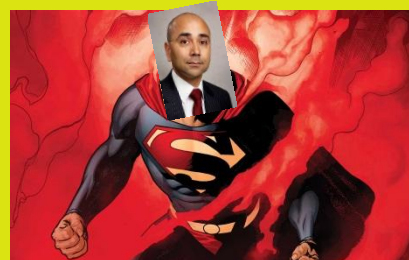

- I seem to work with a lot of colleagues and parents who are similar to me??

Plus...

Alex

The Students

Me

# What I need...

- A single button that is never more than 2 steps away from what I need
- A simple way of using that button
  - Me
  - Colleagues
  - Juniors and wider staff team
  - GPs and primary care
  - Carers

# My three assumptions...

- The relationship has changed
  - From....Triage, knowledge and power
  - To....Fear and frustration
- We don't hold the knowledge anymore
- There is more than enough information out there

# The Pathway...

	Knowledge and Information	Communication	Access	Shared risk	Trust
Patient/Carer					
First contact					
Primary care					
Secondary care					
Secondary care with an interest					
Sub-specialist					

# My (imperfect) solution...
