The future of healthcare: connecting patients with their medical record

My medical record

- allowing patients to co-manage their healthcare online
- reducing the need for hospital visits
- offering 24/7 support and information
- allowing patients to cancel and re-book appointments online
- facilitating online consultations
- capturing pre-assessment data before patients visit our hospitals
- helping patients and clinicians to share information online.

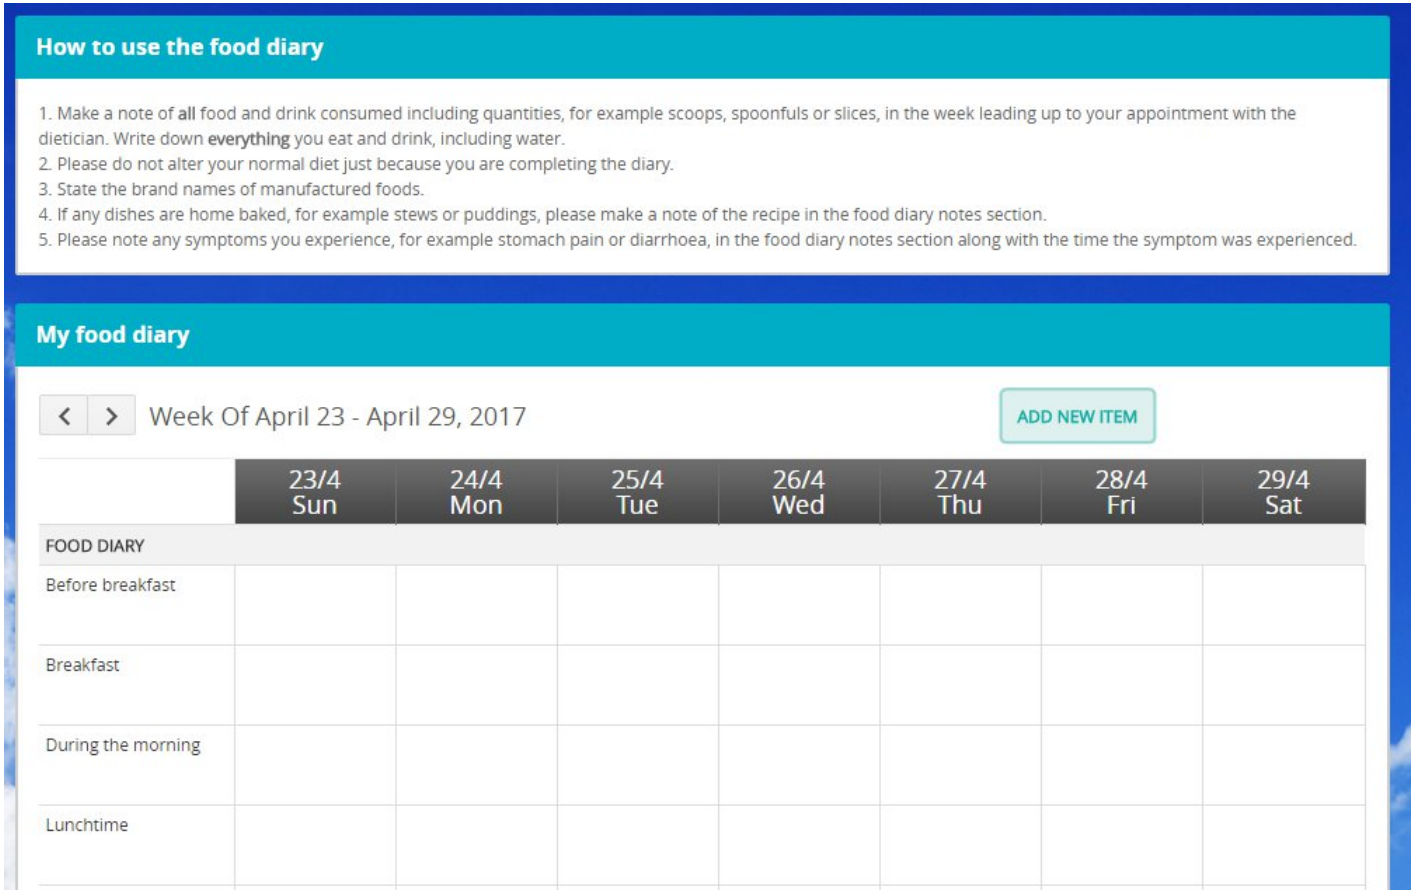
Some practical uses... Online journals



How to use the food diary

1. Make a note of **all** food and drink consumed including quantities, for example scoops, spoonfuls or slices, in the week leading up to your appointment with the dietician. Write down **everything** you eat and drink, including water.
2. Please do not alter your normal diet just because you are completing the diary.
3. State the brand names of manufactured foods.
4. If any dishes are home baked, for example stews or puddings, please make a note of the recipe in the food diary notes section.
5. Please note any symptoms you experience, for example stomach pain or diarrhoea, in the food diary notes section along with the time the symptom was experienced.

My food diary

Screening questionnaire

These questions ask you about a wide range of medical conditions, now and in the past, that will affect your care

	Yes	No
Have you ever had or are you currently being treated for high blood pressure?	○	○

	Yes	No
Have you ever had a heart attack?	○	○

	Yes	No
Have you ever had or are you currently being treated for angina?	○	○

	Yes	No
Have you ever had or are you currently being treated for irregular heart rhythms or do you have a pacemaker?	○	○

NHS

Screening questionnaire

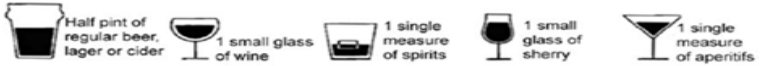
Do you smoke?

- Yes
- No

How often do you have a drink containing alcohol?

- Never
- Monthly or less
- 2 - 4 times per month
- 2 - 3 times per week
- 4+ times per week

This is one unit of alcohol...



...and each of these is more than one unit

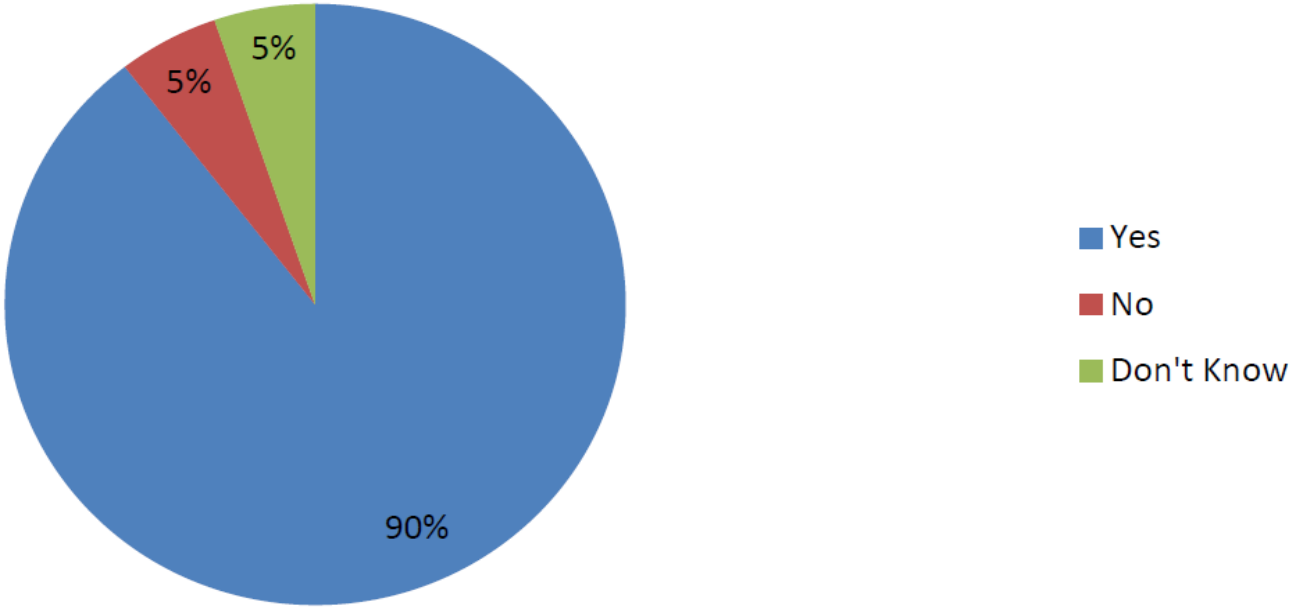
Feedback

When you have had your PSA blood test, have you looked at the 'My health record' website to see your result?



"*I was invited to use My health record and asked to weigh myself using the digital scales once a week. As I was going through a rough patch it was good to know that there were people keeping an eye on how I was doing. If my weight went down too low then I would automatically get contacted by a member of the clinical team.*

I also used the messaging function in the system. It is comforting to have a simple way of telling people you are not feeling well" – IBD patient

“I hate this issue of being in the dark all the time, as I said, we live from result to result, and that period in between, we are left in the dark. I’m not any longer, I’m there, I’m with them, I’m up there with them. Any query, any issue, it’s like going to the board meeting isn’t it where decisions are being made and I can be part of those decisions being made. I really feel I am now part of the team, if you like, and not waiting for the answers, I’m up there with them now, and that’s what team work is all about, isn’t it” – Prostate patient
